Altos Research calculates the Market Action Index which measures available supply relative to the current level of demand. Index value above 30 indicates conditions favor the seller. See the section below for full details.

Trend Key

 Last Month's Trend
  Last Quarter's Trend
  No Clear Monthly/Quarterly Trend

*Metric "Absorbed this Week" covers properties sold and those taken off the market for other reasons. Since sales sometimes take months to close, it is impossible to discern in real-time exactly which properties sold.

CHESTERFIELD

THIS WEEK

The median single family home price in CHESTERFIELD this week is \$479,900. The 469 homes have been on the market for an average of 180 days.

Inventory has been tightening and days-on-market increasing recently. The Market Action Index has been basically flat, not providing strong indication for market conditions.

QUARTILES

To get a tightly targeted understanding of homes in the market, we break each locale into quartiles. Each quartile is 25% of the homes listed.

Most expensive 25% of homes

Upper-middle 25% of homes

Lower-middle 25% of homes

Least expensive 25% of homes

We'll refer to the quartiles in the trend graphs below.

PRICE

Despite this week's up tick, the market seems to have paused around this plateau. The Market Action Index is a good leading indicator for the durability of this shift.

QUARTILE PRICES

Often, we find insights by watching pricing trends within the quartile segments.

Prices have been mixed-to-negative trends in recent weeks. Quartile 4 is down, while the rest of the market is basically flat. Look to the Market Action Index to determine if this plateau is the stage for a prolonged price decline.

PRICE AND VALUE

The market plateau is seen across the price and value. The price per square foot and median list price have both been reasonably stagnant. Watch the Market Action Index for persistent changes as a leading indicator before the market moves from these levels.

INVENTORY

Inventory has been falling in recent weeks. Note that declining inventory alone does not signal a strengthening market. Look to the Market Action Index and Days on Market trends to gauge whether buyer interest is changing with the available supply.

Residential house prices are a function of supply and demand, and market conditions can be characterized by analyzing those factors. Watch this index for sustained changes: if the index falls into the Buyer's Market zone for a long period, prices are likely in for a downward correction.

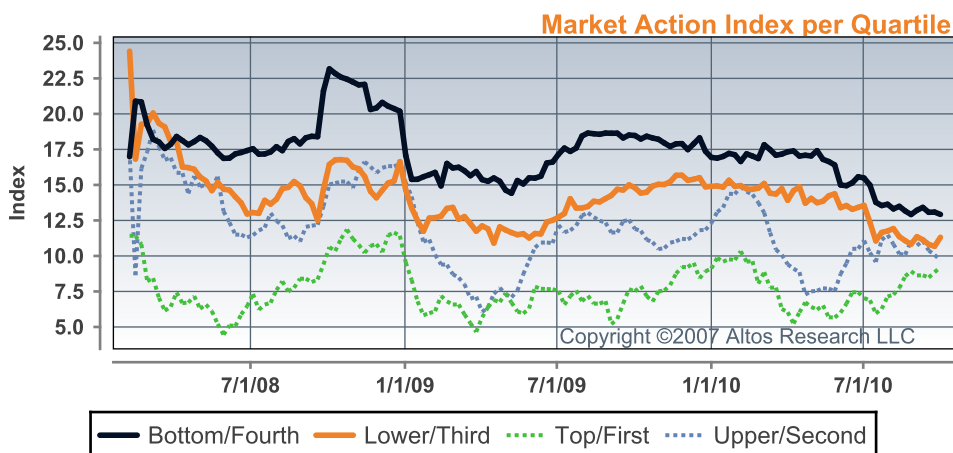

The Market Action Index (MAI) illustrates the balance between supply and demand using a statistical function of the current rate of sale versus current inventory.

An MAI value greater than 30 typically indicates a "Seller's Market" (a.k.a. "Hot Market") because demand is high enough to quickly gobble up available supply. A hot market will typically cause prices to rise. MAI values below 30 indicate a "Buyer's Market" (a.k.a. "Cold Market") where the inventory of already-listed homes is sufficient to last several months at the current rate of sales. A cold market will typically cause prices to fall.

MARKET ACTION INDEX

The CHESTERFIELD market is currently quite strongly in the Buyer's Market zone (below 30). The 90-day Market Action Index stands at 11. With several months of inventory available at the current sales rate, buyers should find ample choice.

The market has shown some evidence of slowing recently. Both prices and inventory levels are relatively unchanged in recent weeks. Watch the Market Action Index for changes as it can be a leading indicator for price changes.

The quartiles can help you answer the question, "How hot is the market for homes in my price range?"

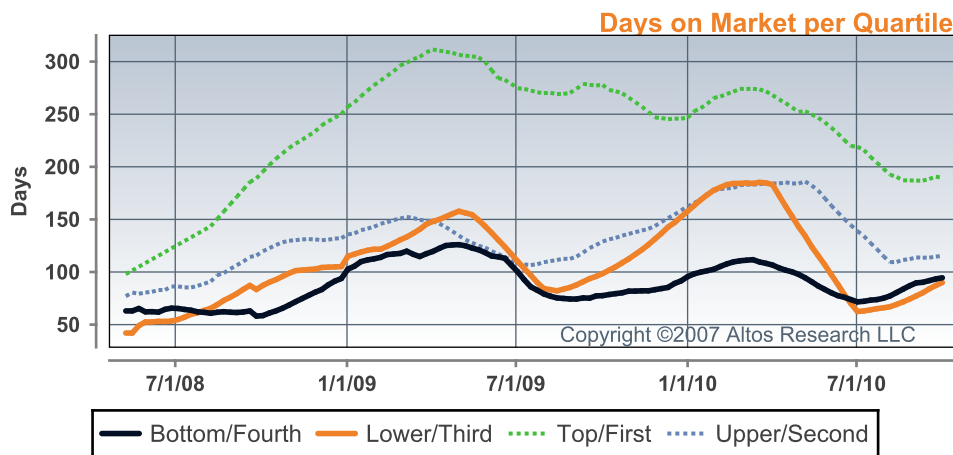

MARKET ACTION QUARTILES

Not surprisingly given the overall Market Action Index, all quartiles are in the Buyer's Market zone with several months of inventory given the current rate of demand for homes in the quartile. Watch the quartile for changes before the overall market shifts. Often one end of the market (e.g. the low end) will improve and signal a strengthening market before the whole group changes.

DAYS ON MARKET (DOM)

The properties have been on the market for an average of 180 days. Half of the listings have come newly on the market in the past 126 or so days.

DOM PER QUARTILE

It is not uncommon for the higher priced homes in an area to take longer to sell than those in the lower quartiles.

THIS WEEK

The median single family home price in CHESTERFIELD 63005 this week is \$676,750.

Inventory has been decreasing lately but the Market Action Index is falling also. With days-on-market climbing, these are relatively negative implications for the market.

PRICE

We continue to see prices in this zip code bouncing around this plateau. Look for a persistent up-shift in the Market Action Index before we see prices move from these levels.
